

BOILER AND RENEWABLE ENERGY SYSTEMS

PRODUCTS

‣ Single Coil Boiler	06-07
‣ Double Coil Boiler	08-09
‣ Accumulation Tank	10 - 11
‣ Buffer Tank	12 - 13
‣ Heat Pump Boilers	14-15
‣ Removable Copper Single Coil Boiler	16 - 17
‣ Removable Copper Double Coil Boiler	18 - 19
‣ Smart Series Electric Boilers	20-21
‣ Electric Boiler	22-23
‣ Solar Water Heaters (120 L - 300 L)	24-25
‣ Solar Water Heaters (500 L - 1.250 L)	26-27
‣ Horizontal Walled Boilers (1.500 L - 5.000 L)	28-29
‣ Horizontal Wall-mounted Coil Boiler	30-31

Our Vision

To be one of the world's largest boiler manufacturers, producing high-quality and economic products globally, and to be the consumers' first choice in terms of service and product quality.

Our Mission

To provide our reliable, high-quality and economical products to our domestic and international customers in a manner that is compatible with human and environmental health.

Values

Experience, technology, knowledge base, innovation and development...

About Us

With a quarter-century of experience, we manufacture boilers, accumulation tanks and buffer tanks for our valued dealers and consumers in our 7,000 m² closed factory area in Kemalpaşa, İzmir.

As followers of developing technology, we continue to serve you with our constantly updated machinery and production area, which is entirely within our own premises.

SINGLE COIL BOILERS

Volume: From 100 liters to 5.000 liters.

Maximum Coil Temperature: 110°C

Maximum Water Temperature: 90°C

Test Pressure: 13 Bar

Operating Pressure: 10 Bar

Internal Surface Coating: Enamel

Outer Cover

100 liter polyurethane over galvanised anthracite electrostatically powder coated or anthracite vinyl leather covering optional,

Anthracite Winleks leather covering over polyurethane from 160 liters to 1.000 liters

Anthracite Winleks leather covering over foam from 1.500 liters to 5.000 liters.

Insulation

Made of polyurethane with a density of 40 kg/m³ and a thickness of 50 mm for capacities ranging from 100 liters to 1.000 liters.

High-density special foam is used for capacities ranging from 1.500 liters to 5.000 liters.

High efficiency with a wider serpentine surface

Practical, economical, modern

- High efficiency with a wider serpentine surface
- Practical, economical, modern
- High-quality and certified materials
- Enamelled
- Cathodically protected
- Thermometer included
- Long-lasting and durable

ACCUMULATION TANK

Volume: From 50 liters to 5.000 liters.
Maximum Water Temperature: 90°C
Test Pressure: 13 Bar
Operating Pressure: 10 Bar
Inner Surface Coating: Enamel

Outer Cover

50 and 100 liter, Polyurethane-coated galvanised anthracite grey electrostatically powder-coated or anthracite vinyl leather-coated option, 160 to 800 liters, Polyurethane-coated anthracite vinyl leather-coated.

From 1.000 liters to 5.000 liters, anthracite vinyl leather coating over foam.

Insulation

Made of polyurethane with a thickness of 50 mm and a density of 40 kg/m³ for capacities ranging from 50 liters to 800 liters.

High-density special foam is used for capacities ranging from 1.000 liters to 5.000 liters.

- Practical, Economical, Modern
- High-quality and certified materials
- Enamelled
- Cathodically protected
- Thermometer included
- Long-lasting and durable

BUFFER TANK

Volume: From 50 liters to 5.000 liters.

Maximum Water Temperature: 90°C

Test Pressure: 13 bar

Operating Pressure: 10 bar

Outer Cover

50 and 100 liter polyurethane over galvanised anthracite grey electrostatically powder coated or anthracite vinyl leather covering optional,

160 liters to 800 liters polyurethane over anthracite vinyl leather covering.

From 1.000 liters to 5.000 liters, anthracite vinyl leather coating over foam.

Insulation

Made of polyurethane with a thickness of 50 mm and a density of 40 kg/m³ for capacities ranging from 50 liters to 800 liters.

High-density special foam is used for capacities ranging from 1.000 liters to 5.000 liters.

- Practical, Economical, Modern
- High-quality and certified materials
- High Efficiency
- Cathodically protected
- Thermometer included
- Long-lasting and durable

REMOVABLE COPPER SINGLE COIL BOILER

Volume: From 300 liters to 5.000 liters.

Maximum Coil Temperature: 110°C

Maximum Water Temperature: 90°C

Test Pressure: 13 Bar

Operating Pressure: 10 Bar

Inner Surface Coating: Enamel

Outer Cover

Anthracite vinyl leather covering over sponge.

Insulation

High-density special sponge has been used.

- Highly efficient with a wider coil surface area.
- Practical, economical, modern.
- High-quality and certified materials.
- Enamelled.
- Cathodically protected.
- Thermometer included.
- Long-lasting and durable.

REMOVABLE COPPER DOUBLE COIL BOILER

Volume: 300 liters to 5.000 liters.
Maximum Coil Temperature: 110°C
Maximum Water Temperature: 90°C
Test Pressure: 13 Bar
Operating Pressure: 10 Bar
Inner Surface Coating: Enamel

Outer Cover

Anthracite vinyl leather covering over sponge.

Insulation

High-density special sponge has been used.

- Highly efficient with a wider coil surface area
- Practical, economical, modern
- High-quality and certified materials
- Enamelled
- Cathodically protected
- Thermometer included
- Long-lasting and durable

SMART SERIES ELECTRIC BOILERS

Volume: 100 to 300 liters.

Maximum Water Temperature: 90°C

Test Pressure: 13 Bar

Operating Pressure: 10 Bar

Inner Surface Coating: Enamel

Outer Casing

Polyurethane over galvanised anthracite grey electrostatically powder-coated

Insulation

Made of polyurethane with a thickness of 50 mm and a density of 40 kg/m³

Digital Screen

The touchscreen provides ease of use.

The desired hot water requirement can be easily adjusted on the screen.

If desired, the device can be controlled remotely.

Thanks to its smart feature, the water used has antibacterial properties.

- Practical, Economical, Modern
- High-quality and certified materials
- Enamelled
- Cathodically protected
- Digital display with thermometer
- Long-lasting and durable
- Electric

ELECTRIC BOILER

Volume: 200 liters to 2.000 liters.
Maximum Water Temperature: 90°C
Test Pressure: 13 Bar
Operating Pressure: 10 Bar
Inner Surface Coating: Enamel

Outer Cover

Polyurethane over anthracite vinyl leather coating for 500 to 1.000 liters.
Foam over anthracite vinyl leather coating for 1.500 to 2.000 liters.

Insulation

50 mm thick, 40 density polyurethane for 500 to 1.000 liters.
High-density special foam is used for capacities from 1.500 to 2.000 liters.

- Highly efficient with a wider serpentine surface
- Practical, economical, modern
- High-quality and certified materials
- Enamelled
- Cathodically protected
